TERMINAL DISCLAIMER OF PATENT APPLICATION (37 C.F.R. 1.321(b))
(signed by joint patent owners)

S.S.C.I., Inc. and Purdue Research Foundation (hereinafter referred to as "the joint owners") jointly own all rights in U.S. Patent No. 6,642,060 and in the present patent application Serial No. 10/688,123.

The undersigned are officers of the respective joint owners of the present application, and are respectively authorized by S.S.C.I., Inc. and Purdue Research Foundation to sign this disclaimer on behalf of the joint owners.

U.S. Patent No. 6,642,060 claims the priority of United States Patent Application No. 09/752,788, filed on December 28, 2000. U.S. Patent Application No. 09/752,788 does not claim priority to any previous non-provisional patent application. The term of U.S. Patent No. 6,642,060 has been extended or adjusted under 35 U.S.C. § 154(b) by 84 days. The expiration date of the full statutory term defined in 35 U.S.C. §§ 154 to 156 and

173 of U.S. Patent No. 6,642,060, under the current law and the facts as the undersigned knows them, is therefore understood to be March 22, 2019 – twenty years after the filing date of United States Patent Application No. 09/752,788, plus 84 days of term extension or adjustment. U.S. Patent No. 6,642,060 is not presently subject to any terminal disclaimers. Any error in the foregoing calculations or recited facts or change in the full statutory term defined in 35 U.S.C. §§ 154 to 156 and 173 of U.S. Patent No. 6,642,060 shall not affect the scope or effect of the following disclaimer in any way.

DISCLAIMER

The joint owners hereby disclaim any terminal part of the statutory term of the patent issuing from the present patent application Serial No. 10/688,123 which would extend beyond the expiration date of the full statutory term defined in 35 U.S.C. §§ 154 to 156 and 173 of U.S. Patent No. 6,642,060, except as provided below.

The joint owners hereby agree that the present application and any patent issuing from this application shall be enforceable only during such period or periods that the present application and the patent issuing from this application is commonly owned with U.S. Patent No. 6,642,060. This disclaimer shall run with the present application and any patent issuing from this application, and shall be binding upon the joint owners and their successors or assigns. This disclaimer shall not prevent either of the joint owners and their successors or assigns from transferring to another party its ownership of the present application and any patent issuing from this application simultaneously and together with its ownership of U.S. Patent No. 6,642,060.

This terminal disclaimer shall not shorten the term of any patent issuing from the present application to less than the full statutory term defined in 35 U.S.C. §§ 154 to 156 and 173 of U.S. Patent No. 6,642,060, even if U.S. Patent No. 6,642,060 later: expires for failure to pay a maintenance fee; is held unenforceable or is found invalid by a court or administrative agency or other entity; is statutorily or terminally disclaimed under 37 C.F.R. § 1.321; has any or all claims cancelled or amended by a reexamination certificate,

reissue, or other proceeding; or is terminated in any manner prior to the expiration of its full statutory term defined in 35 U.S.C. §§ 154 to 156 and 173.
